

CITY OF PLAYFORD ENVIRONMENTAL CONCERNS

NEXT GREAT CITY

Council often receives enquires from members of the public to find out to who is responsible for issues such as noise, dust, waste, mud, water pollution, security fences and boundary encroachments. Whilst some activities on construction sites are noisy or may generate dust and mud, some of these may often be controlled using improved work practices.

During the construction of any large development the contractor is ultimately responsible for managing all such matters. Firstly, we would suggest contacting the Site Manager or Agent. Their name and contact number should be clearly displayed at the main entrance to the site.

Should this prove ineffective, you may contact the Council on 8256 0333 or the [Environment Protection Authority](#) (EPA) Customer Services Centre on (08) 8204 2004 during normal working hours or via their web site.

This fact sheet is a guide only and will not necessarily provide adequate information relevant to every situation. Whilst it seeks to explain your possible obligations in a helpful and accessible way, it is likely that some detail may not be captured. It is important, therefore, that where necessary you make your own determination as to whether you should seek legal advice.
