Decommissioning of a High-Risk Manufactured Water System (HRMWS)

About this form

Whenever a business decommissions or removes a High-Risk Manufactured Water System (HRMWS) the business must, under the [South Australian Public Health \(Legionella\) Regulations 2013](#), notify Council within one (1) month of decommissioning the system. In order to notify Council, please complete and return page two of this form to the Environmental Health Team.

The completed form can be sent to Environmental Health Team at the City of Playford via:

Post: Environmental Health Team **OR** Email: eho@playford.sa.gov.au
12 Bishopstone Road
Davoren Park SA 5113

Failure to notify Council is an offence, and may result in the following penalties:

Maximum penalty: \$750

Expiation fee: \$80

NB: if a HRMWS is recommissioned, or a new system is installed, the owner of the premises is responsible for registering these changes with the City of Playford within one (1) month of these changes being implemented.

Where to find more information

If you would like further information about the legislative requirements for running or decommissioning a high-risk manufactured water system, please contact Council's Environmental Health Team on (08) 8256 0333.

Cooling Water System (CWS) Details

Number of CWS' to be decommissioned:

Identification name/registration number as listed on the HRMWS Registration Certificate:

Are any systems remaining in service onsite? Yes/No

Please tick one or more boxes to indicate how the CWS has been decommissioned:

- All of the fans of the Cooling Water System are removed from the tower
- All the fans of the Cooling Water System are isolated from the power supply
- The water supply to the Cooling Water System is disconnected and the water is drained from the system
- The system is changed so that (when in operation) the water of the Cooling Water System does not recirculate in the system
- The system is changed so that it is no longer a Cooling Water System, as defined by AS/NZS 3666.1

Warm Water System (WWS) Details

Number of WWS' to be decommissioned:

Identification name/registration number as listed on the HRMWS Registration Certificate:

Are any systems remaining in service onsite? Yes/No

Please tick one or more boxes to indicate how the CWS has been decommissioned:

- The system distributes or recirculates water through the majority of its branches at or above 60°C
- Temperature controlling devices (such as thermostatic mixing valves or tempering valves) are within six metres from any outlet
- The water supply to the Warm Water System is disconnected and the water has been drained from the system
