

NOTICE TO RESIDENTS

CIVIL WORKS ON FERRIS STREET, DAVOREN PARK

The City of Playford is pleased to advise that civil works on Ferris Street, Davoren Park will shortly commence as part of Council's Capital Works Program.

Kerb-Tec has been engaged by Council to undertake these works.

When will work start?

Construction works are scheduled to commence on Monday, 9 February 2026, and are expected to be completed by 30 March 2026, weather permitting. Inclement weather or unforeseen site conditions may result in changes to this schedule.

How will this affect me?

At times, construction activities may temporarily affect access to your driveway or residence. Kerb-Tec will work closely with residents to minimise disruption wherever possible.

Footpaths may be temporarily closed to pedestrians during construction; however, access will be reinstated as soon as works are completed. Traffic control signage and temporary speed restrictions will be in place to ensure the safety of pedestrians, residents, and motorists.

During works, existing stormwater pipes may occasionally be damaged during demolition. Should this occur, the contractor will repair or replace the affected infrastructure as part of the works.

If works involve the section of driveway that crosses the new surface, Kerb-Tec will excavate the affected area and may temporarily backfill with quarry materials until the driveway is reinstated.

How can I help?

To assist in the efficient delivery of the works, residents are kindly requested to:

Clearly mark any irrigation pipes or sprinkler heads located within the Council verge.

Trim back any hedges or vegetation encroaching onto the verge to allow safe and unrestricted access for construction activities.

If you have any questions or require further information, please contact Kerb-Tec's representatives:
Hayley 0451 210 067 or Alessandra, on 0433 666 104.

We apologise for any inconvenience caused during the course of these works and thank you in advance for your understanding and cooperation.

Yours sincerely,

Michael Donnelly
Director
Kerb-Tec
