

Dear Residents / Motorists

City of Playford has contracted Stabilised Pavements of Australia to carry out road rehabilitation at **Ryan Road**, between Port Wakefield Hwy and Supple Road. These roads will be closed to through traffic; please expect delays. However, access to the property will be maintained on during the construction of the road. Works start from 4th of May and will go to 15th of May.

Works shifts are planned to commence at 7.00 am and be completed by 5.00 pm each day. We will ensure that the inconvenience is as small as possible.

Our traffic controllers will provide direction for you, and we will endeavor to keep all properties accessible during the work shift, subject to the delays mentioned above.

For the works to be carried out as smoothly, safely and with less inconvenience for you, we would ask for your co-operation for the following:

1. Please do not allow children to play in the street, and take care to keep your pets away from the work area as heavy equipment will be present.
2. Obey all traffic controllers on site for your own safety.
3. Pedestrian access will not be allowed along the road
4. It would help to stay clear of the worksite (road pavement under construction) unless attempting access/egress strictly under the direction of traffic control or a SPA site representative.

We apologise for any inconvenience this may cause. We look forward to providing you with a new, improved road surface using our specialist treatments, resulting in the recycling of up to 100% of existing site materials.

If you have any concerns, please get in touch with our works manager on 0455 566 706 or the council.

Thank you

Your road is about to be recycled

**STABILISED
PAVEMENTS
OF AUSTRALIA**
PTY LTD
STRENGTH • FLEXIBILITY

Council has chosen to rehabilitate your road by recycling the existing materials.

This process results in a high quality finished product whilst being a cost effective solution with minimal waste and the lowest CO₂ emissions.

- Up to 100% of the road is recycled because all the materials needed for a new road are already there
- Preserves natural resources
- Stops the waste of valuable materials into landfill
- Reduces greenhouse gas emissions by over 50%
- Fast construction as road recycling all happens on site
- Prevents hundreds of trucks on local roads
- Cost efficient solution allowing more roads to be upgraded every year
- High quality road pavements are designed to Australian Specifications to last up to 40 years

We are a 100% Australian, family owned company providing road recycling services for Local Government, State Road Authorities and private developers in Australia. Our sustainable pavement solutions are based on engineering expertise and follow certified quality, safety and environmental standards.

As a company who gives back to the local community, our commitment to you is to provide prompt service as we deliver cost saving solutions that benefit the environment.
