

WORK LOCATION

TWO WAY - TWO LANE ROADS						
Length of zone (m)	* - For 70-110km/h roads, D = speed of approaching traffic					
Road Speed (km/h)	n/a	50	60	70	80-110	
Buffer Zone (m)	4/4	n/a	n/a	n/a	300m > 50m	
Advance Warning (m)	D = 5	D = 15	D = 45	D* = 70	D**	
Taper Area (m)	15	15	30	30	n/a	
Safety Buffer (m)	Optional	Optional	20 - 30	20 - 30	20 - 30	
Termination area (m)	Optional, 5	Optional, 5	Optional, 15	Optional, 15	Optional, 15	

Any Conflicting Speed Signs MUST be covered - this includes Advisory Speed Signs. If you are unable to cover a speed sign then work may not commence until it is covered - Contact the Office for further instructions & guidance

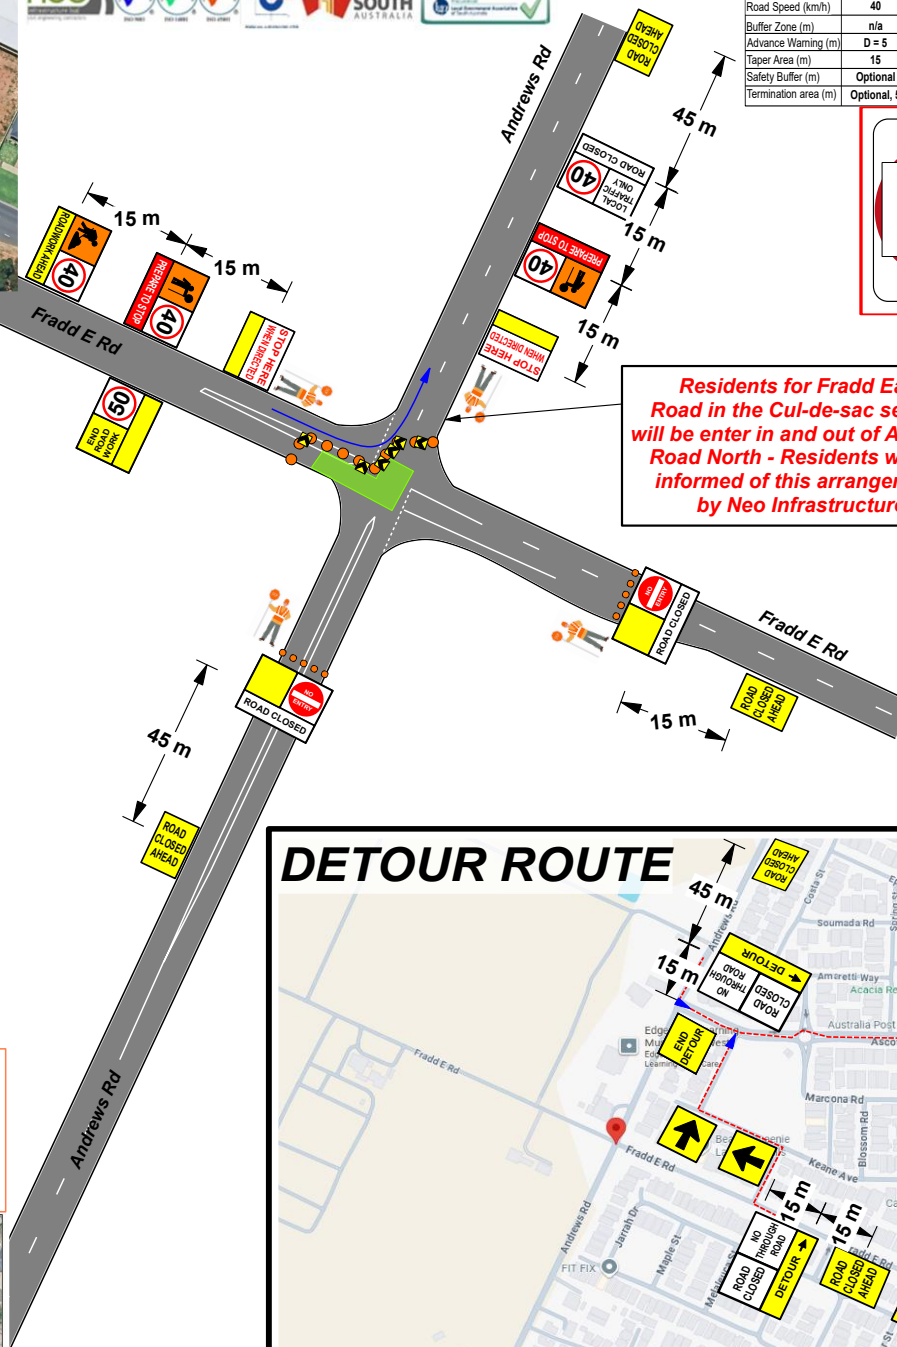

DANGER
HIGH PRESSURE
TESTING
IN PROGRESS

The road must be closed during high pressure testing. Traffic Team will set up the closure and when testing is to occur then all traffic will be stopped. Traffic Team MUST be located at least 50m from the testing location and be wearing full PPE including hard hat.

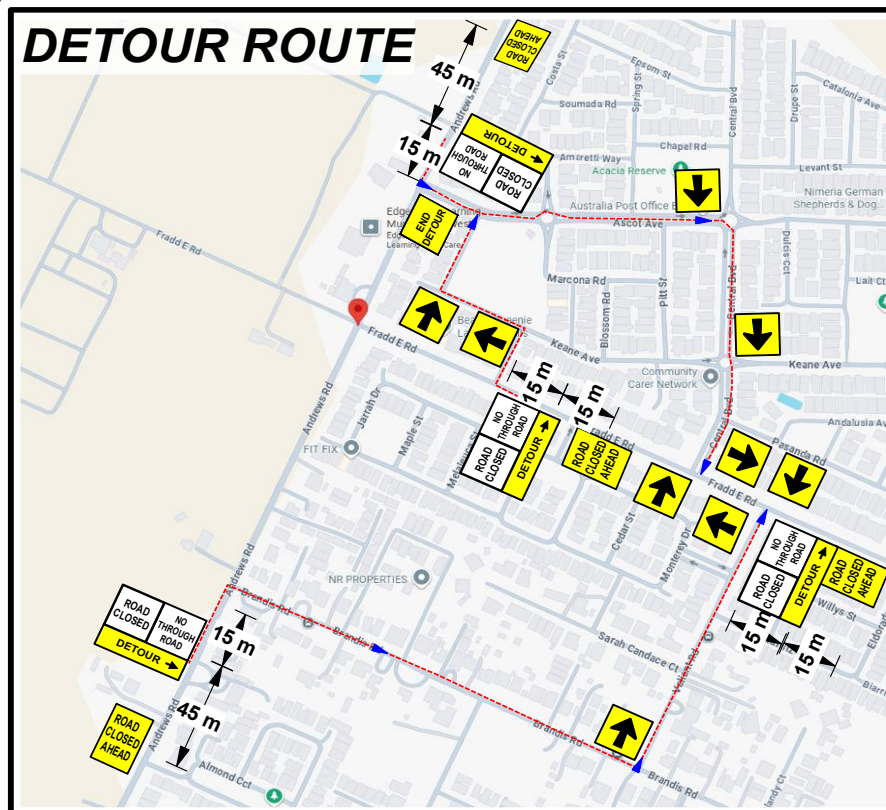

There are current works in the area with Fulton Hogan Utilities Team. Traffic Team to ensure that set up does not conflict with other works and that any conflicting signage that is covered is reinstated at the completion of the shift.

Fulton Hogan have communicated that they do not work on Saturdays and while there may be some aftercare signage onsite there is no 24 hour closures in the area.

Design Example below is provided by current traffic company onsite of what may be in place at various times
